Logan Alexander Dufek

952-693-8954 (cell)

logandufek@gmail.com

Summary   Experienced in leadership, both while in school and in professional environments. Able to instruct beginners on how a job should be accomplished, due to a detail oriented mindset, yet allowing them to add their own flair. Creative when problem solving and takes direction well.

Education   Bachelor of Arts, Nutritional Biochemistry, Case Western Reserve University, Cleveland OH 2019

Special Skills and Competencies Proficient in MATLAB, HTML, CSS, Javascript, NodeJS Microsoft Office Suite, knowledgeable in the Spanish & German language. Leadership experience in various roles both inside and outside of school. Creative and curious. Able to adapt.

Experience and Accomplishments

FREELANCE VIDEO EDITOR, FREDERATOR STUDIOS   May 2019- June 2020

New York, NY

As a Freelance Editor for Frederator, my responsibilities were to edit clips of their hosts speaking about particular topics, and then acquire a wide range of assets to go along with what is said. My work was then checked and I was given notes on improvements that should be made. This happened several times until a final version was compiled. This was to ensure quality work before the video was posted. While the editing techniques were fairly standard, I was been able to put my own creative spin on every project I was given.

SAGE PRAIRIE COMMUNITY SERVICES   November 2020 - Present
VOLUNTEER

Sage Prairie Community Services is a non-profit start-up that provides financial, emotional and consulting services to people who suffer from substance use disorder. I volunteered to build a website for them despite the fact that I knew very little about it. I was able to get the site set up and then provided all of the content using Squarespace. I presented the site to their Board of Directors recently and they were very impressed.

CWRU FULLSTACK WEB DEVELOPMENT BOOTCAMP   May 2021 - Present

Currently I am enrolled in a Fullstack Web Development Bootcamp which has so far covered HTML, CSS, and Javascript languages, and several 3rd Party and Server-side APIs. The following is an example of work from that Bootcamp: https://bit.ly/3gYnsfR It is a course that has tested me thus far but I have been enjoying every part of the process and look forward to learning more each week.

CHILDREN'S HOSPITAL MN   May 2014

      VOLUNTEER

Responsible for entertaining kids of all ages, ensuring they had fun despite their current situation. This could involve anything from arts and crafts, to pulling them around in a kart.

- Left each kid with a smile on their faces and, I'd like to hope, their spirits raised.
- Noted as being one of the warmest and friendliest volunteers that summer.
